

P04 React Native (1)

1

Install React Native (Expo CLI recommended)

<https://reactnative.dev/docs/environment-setup>

2

Implement a prototype of your project's result page in React Native using static data.
The result list should be scrollable.

3

Install (i.e., copy&paste) your application to Snack.

<https://snack.expo.io>

Add the Snack link to your project description in the Wiki.
